

# SUNNIN' SOLAR TO-DO LIST

---

☐

**Check your roof condition** — Look for visible wear from the ground or ask a roofer for a basic inspection report if unsure.

---

☐

**Research your sun exposure** — Use the Project Sunroof website for a sun exposure analysis.

---

☐

**Gather 12 months of electric bills** — Know your average monthly usage and costs by calculation or call your electrical company.

---

☐

**Review your HOA rules** — Find out if there are any restrictions or approvals on solar panel placement.

---

☐

**Check for shade** — Note any large trees or buildings that could block sunlight.

---

☐

**Review local permitting info** — Visit your city or county website for solar permit requirements.

---

☐☐

**Once you've completed most or all of this checklist, you're ready to explore your solar system options in the next section.**
